## Paguro 12000V

### Variable Speed Marine Generator

|  |  |
|--|--|
| Generator manufacturer                           | Volpi Tecno Energia (VTE)  |
| Generator type                                   | Permanent magnet   |
| Continuous power output                          | 12kVA - 11kW   |
| Peak (current) output for 2 seconds              | 80 A   |
| Voltage / Frequency                              | Single phase 230 V AC / 50 Hz  |
| Noise level @ 7m                                 | 50 - 53 dB(A)  |
| Weight (triple skin soundproof capsule included) | 170 kg   |
| Remote control                                   | Fitted with hourmeter, load indicator, automatic shut-off device for low oil pressure and water over temperature, starting motor self disengagement, 13 m cable and socket |
| Engine Manufacturer                              | Lombardini Marine  |
| Engine type                                      | LDW 1003 - 3 cylinders   |
| Mechanical power (continuous) 50 Hz              | 17 kW  |
| Continuous speed 50 Hz                           | 1800 - 3000 rpm  |
| Fuel consumption                                 | 0.35 l/kW/h  |
| Engine cooling system                            | Fresh water with heat exchanger  |
| Cooling pump                                     | Johnson - self-priming direct drive  |
| Starting and shut-off system                     | 12 V electrical starter remote controlled  |
